

Guerrero, Nestor Rey C.

BSCS 1-Y1-1

Flowchart & Algorithms

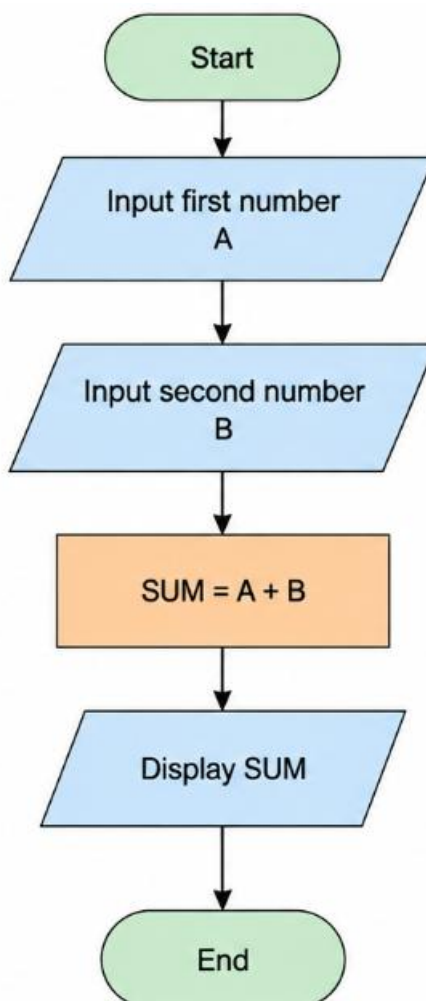

1. Write an algorithm and draw the flowchart that will get the sum of two numbers.

1. Sum of Two Numbers

Algorithm

1. Start
2. Input the first number A.
3. Input the second number B.
4. Compute $SUM = A + B$.
5. Display SUM.
6. End.

Flowchart:

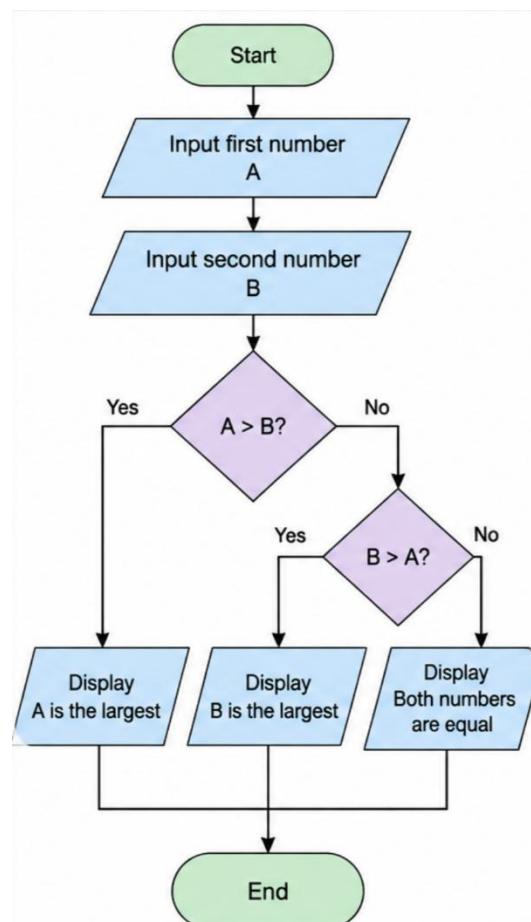

2. Write an algorithm and draw the flowchart that will get the largest among two numbers.

2. Largest Among Two Numbers

Algorithm

1. Start.
2. Input the first number A.
3. Input the second number B.
4. Compare A and B.
5. If $A > B$, display A as the largest.
6. Otherwise, if $B > A$, display B as the largest.
7. If $A = B$, display that both numbers are equal.
8. End.

Flowchart:

3. Write an algorithm and draw a flowchart to determine the student's final grade on three subjects and indicate whether it is passing or failing.

3. Final Grade for Three Subjects

Algorithm

1. Start.
2. Input the grade for Subject 1.
3. Input the grade for Subject 2.
4. Input the grade for Subject 3.
5. Calculate the final grade:
$$\text{FINAL GRADE} = (\text{Subject 1} + \text{Subject 2} + \text{Subject 3}) / 3$$
6. Display the final grade.
7. If the final grade is 75 or higher, display "PASSING".
8. Otherwise, display "FAILING".
9. End.

Flowchart:
